

Design & Timber Frame: New Energy Works

## Inspired Vision. Relentless Commitment.

**Elk Creek Forest Products is a family-owned and operated full-service lumber processor and distribution company stocked with over 25 million board feet of premium high-end lumber and timbers suitable for exposed uses as well as commodity lumber sourced from the Northwest's finest sawmills.**

We are grateful for the opportunity to serve buyers from across the nation and are thrilled to see our timbers in place in high-profile infrastructure like airports and high-end retail while our structural construction lumber goes to work in housing and essential infrastructure.

Determination and commitment to service have defined Elk Creek since our humble beginnings a generation ago. We attribute our continuing growth to strong partnerships with sawmills; care for our employees; and ongoing process innovation and investments.

Along those lines, we thrive on the opportunity to say 'yes' to customer requests — whether by quickly filling an order for 2x4 through 12x12 with available lengths from 8' to 40' and longer, or by locating or milling unique, hard-to-source Douglas-fir products. This responsive approach applies to all we do, from custom orders to order size and shipping solutions.

We look forward to serving you and welcome inquiries. Reach out to our dedicated sales team to learn more.

**INSPIRED VISION. RELENTLESS COMMITMENT.**
