

# Hinoki/Japanese Cypress

Traditional Japanese architecture utilizing Hinoki

Native to Japan, Hinoki is known for its rot resistance and durability. Used for hundreds of years in the traditional construction of Japanese temples and buildings, this hardy, beautiful lumber is now available for a wide range of residential and commercial building applications. The American Lumber Standard Committee approved Hinoki design values in 2024 for structural use in the United States and we expect to see increasing demand for this quality product.

## Available Dimensions

2x4 S4S
